How to change server locations on VPN router

Step1: Connect to the VPN router

Connect to the Internet through the VPN router. Make sure you are connected to the VPN on the device you are using.

Step2: Type URL for the dashboard

Open search browser and type "expressvpnrouter.com". (or you can type "192.168.132.1"

Step3: Log in to the ExpressVPN dashboard

You will be asked to input a password to log in to the VPN configuration page. Your password will be your SSID but <u>in all lowercases</u>. (If your SSID is "HEROVPN004", your password will be "herovpn004")

Step4: Change the location of the server to a US location.

Set the server to your preferred location. (Recommended location: San Francisco) You can choose a location from "RECOMMENDED" or you can select on from "ALL LOCATION" tab.
